

Role of ICEIDA

Thoughts and Issues

- What are ICEIDA's technical strengths?
- Who are your "competitors"? Why are you better than them?
- Where is ICEIDA's comparative advantage?
- Where is ICEIDA's experience?
- What are ICEIDA's institutional strengths?
- Where are the future opportunities?
- Who can ICEIDA forge alliances with? Are there key differences in approach that would prevent this happening?
- Should ICEIDA focus – of so how? An issue based focus? Sector based? Country based?

Thoughts and Issues

- Modalities – should ICEIDA ever provide general budget support “or would it just be a drop in the ocean?”
- What is the “ideal” form of support: sector budget support? Integrated projects with strategic impact?
- Bilateral or multilateral? Which?
- Criteria for supporting countries:
 - commitment?
 - lack of capacity?
 - those in greatest need? fragile states?
 - those with less donor overcrowding?
